OBJECTIVE

Data Analyst with professional experience in analyzing and transforming large-scale datasets across Retail, Automotive, Entertainment, and Banking domains. Skilled in SQL Server, Python, Excel, and Power BI for data extraction, validation, transformation, reporting, and business analysis. Strong foundation in Statistics, Forecasting, and Marketing Mix Modeling (MMM), delivering high-quality analytical solutions that enable data-driven decision-making.

EDUCATION

Master of Science (M.Sc.) in Statistics , University of Mysore	2022 - 2023
Bachelor of Science (B.Sc.) in Statistics , Yuvaraja college Mysore	2018 - 2021

SKILLS

Programming Languages	SQL, R, Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn)
Data Visualization and Reporting	Microsoft Excel, Power BI, Dashboard Development, Data Storytelling.
Analytics and Business Intelligence	Exploratory Data Analysis (EDA), Statistical Analysis, Business Reporting, KPI Analysis, Root Cause Analysis, Data Modeling
Data Management and Processing	Data Cleaning, Data Transformation, Data Validation, Data Quality Management, Data Reconciliation, Attribute Mapping, Data Extraction
Forecasting and Advanced Analytics	Marketing Mix Modeling (MMM), Predictive Analytics, Time Series Forecasting, Regression, Classification, Clustering

EXPERIENCE

Analyst , Ipsos Research Pvt. Ltd. Bengaluru.	March 2026 - Present
--	----------------------

- Analyzed, transformed, and validated large-scale datasets across Retail, Automotive, and Entertainment projects using SQL Server, Python, and Microsoft Excel, ensuring data accuracy, consistency, and compliance with client requirements.
- Developed and optimized SQL Server queries for data extraction, data cleansing, transformation, attribute mapping, and data validation, improving data quality and streamlining analytical workflows.
- Supported Marketing Mix Modeling (MMM) initiatives by preparing and validating datasets, applying business rules, and supporting forecasting, predictive modeling, and analytical reporting.
- Collaborated with cross-functional stakeholders to resolve data quality issues, standardize business attributes, and deliver high-quality analytical datasets that supported timely client reporting and data-driven business decisions.

Process Executive , Infosys BPM Ltd, Mysore.	February 2025 - March 2026
---	----------------------------

- Processed and validated high-volume financial transactions for a U.S. banking client, ensuring data accuracy, regulatory compliance, and adherence to internal controls and operational standards.
- Investigated transaction discrepancies through data validation, reconciliation, and root cause analysis, resolving exceptions to maintain data integrity and support accurate financial reporting.
- Generated operational reports, collaborated with quality assurance, audit, and cross-functional teams, and supported process improvement initiatives that enhanced reconciliation accuracy and reduced recurring errors.

Intern Data Analyst , QUANTIUM, Bengaluru	July 2024 - January 2025
--	--------------------------

- Analyzed large business datasets using SQL and Python to identify trends, generate actionable insights, and support data-driven decision-making and process improvement.

- Developed and maintained BI dashboards and analytical reports, ensuring data accuracy, effective visualization, and timely delivery of insights to business stakeholders.

PROJECTS

FNP Sales Analysis.

- Built an end to end analytics and predictive modeling solution for an occasion driven Flowers and Gifts business to understand sales behavior improve demand planning and support operational decisions.
- Developed sales forecasting demand prediction and customer segmentation models using time series analysis RFM and K Means with clear evaluation using MAE and R2.
- Translated analytical results into business focused insights that supported inventory planning customer targeting and delivery optimization. ([Try it here](#))

Flipkart SQL Case Study.

- Solved real-world business questions using complex SQL queries involving joins, aggregations, CTEs, and window functions.
- Focused on clean query design and accurate data extraction to deliver precise analytical answers.([Try it here](#))

AI Powered Stock Price Forecasting System

- Designed a stock price prediction system using historical market data and technical indicators with an emphasis on learning price behavior over time.
- Integrated multiple signals and evaluated model performance to understand prediction reliability in changing market conditions. ([Try it here](#))

COURSE AND CERTIFICATES

- Data Analyst Expert by Cisco [View Certificate](#).
- SQL Expert By HackerRank [View Certificate](#).
- Data Analytics Using Power BI [View Certificate](#).
